1. On 11 February the area of the blast ngs at Rostock-Marienehe was inspected by a mixed commission of three high Soviet officers, several civilians and some surveying and construction engineers. The inspection lasted two hours.

2. This is a completely Russian project. Gigantic underground halls are being built, although it is uncertain whether these are construction buildings or storerooms. Structural steel and concrete are being constantly carried in, and an enormous number of laborers are at work. The area is about 500 x 1000 m. It begins close to the fishery farm and reaches almost to the former barracks.
